- There is no fee to attend this course.
- Class is limited to 30 students
- No Lodging is provided during this course.
- Lunch break to be provided.
- Deadline is June 18, 2024

Overview: This course is designed for personnel associated with On-Scene Incident Command, EOCs and Multiagency Coordination (MAC) System entities. The goal of the course is to provide state and local emergency management officials with the knowledge and skills they need to operate an Emergency Operating Center (EOC) and interface it with an Incident Command System (ICS) field operation. It enables the participants to begin developing an ICS/EOC interface for their community by applying Incident Command System (ICS) principles. The course reviews ICS and EOC responsibilities and functions and depends heavily on exercise and group discussions to formulate the interface.

Prerequisites: IS0100.b, IS0200.b, IS0700.a, IS0800.b
