Tips for Your Emergency Supply Kit

- Place items in airtight bags and store them in waterproof, easy-to-carry containers, such as a tub or trash bin.
- Keep important documents in a waterproof container.
- Add last-minute items when a warning or evacuation is issued.
- Store at least a 3-day supply of non-perishable food and water (1 gallon per person per day). Rotate food and water every 6 months.
- Check your kit monthly and update it for changing needs.
- Store the kit near a main exit and let your family know where it is.
