Nebraska Emergency Management Agency

Emergency Support Function Coordinators for the following functions:

- Transportation
- Communications
- Public Works and Engineering
- Fire Suppression
- Emergency Management
- Mass Care
- Resource Support
- Public Health
- Oil and Hazardous Materials
- Agriculture
- Energy
- Public Safety
- Military Support

Nebraska Governor's Homeland Security Policy Group

Nebraska Senior Advisory Council

PURPOSE

This Integrated Preparedness Plan (IPP) contains preparedness priorities and outlines steps designed to build and sustain capabilities. The plan is intended to provide direction, accountability, and coordination.

This IPP lays out Nebraska's threats, hazards, and risks along with other internal and external factors which influence the preparedness priorities for CY2026. The preparedness priorities, corresponding capabilities, and rationale are included in the IPP with multi-year calendars outlining all preparedness activities.

This IPP is designed to be a living document that will be updated and refined annually or as needed to inform the continuous improvement of our community's ability to build, sustain, and deliver capabilities.

PREPAREDNESS ACTIVITY CONSIDERATIONS

The IPP is a foundational document to guide successful preparedness activities for responding to, recovering from, and mitigating the effects of the threats, hazards, and risks deemed the most applicable to the area. The IPP establishes priorities and goals that will guide the state efforts to build, improve, and sustain capabilities across a broad range of core capabilities.

THREATS, HAZARDS, AND RISKS

Nebraska utilizes the Threat and Hazard Identification and Risk Assessment (THIRA) to identify the most likely hazards that may affect Nebraska and the communities within the state. These are by no means the only possible incidents that could occur in the state. Modifications are made to the THIRA based on a continued assessment of risks.

Planning begins with events that are expected to challenge current capabilities the most, while also taking into account those that occur often and have potentially high impacts on life and property, followed by those with more moderate probabilities or moderate impacts.

The threats, hazards, and risks identified for Nebraska as having the greatest impact or challenging capabilities the most are:

- Agricultural Disease
- Cyber Attack
- Suicide Bombing Attack
- I-80 Bridge Collapse
- Pandemic
- Tornado
- Wildfire

EXTERNAL SOURCES AND REQUIREMENTS

As a recipient of grants under the State Homeland Security Grant Program (SHSP), current requirements include six priority areas:

- Enhancing cybersecurity
- Enhancing the protection of soft target and crowded places
- Combating domestic violent extremism
- Enhancing community preparedness and resilience
- Enhancing information and intelligence sharing and analysis
- Emerging election security.

PREPAREDNESS PRIORITIES

To determine the preparedness priorities, a series of surveys were conducted consecutively. The ESFs and county emergency management officials were surveyed first. Those results were given to the Nebraska Senior Advisory Council for the council members to modify as they saw fit in a second survey. Finally, the second survey results were given to the Nebraska Governor's Homeland Security Policy Group for final input and approval.

This process identified the following ten priorities as the focus for the multi-year cycle of preparedness for CY 2026-2028.

Public Health, Healthcare, and Emergency Medical Services
Operational Communications*
Cybersecurity
Community Resilience
Planning*
Operational Coordination*
Mass Care Services
Situational Assessment
Environmental Response - Health and Safety
Intelligence and Information Sharing

*These three capabilities are designated Nebraska EMPG priorities, as agreed upon after discussions with FEMA Region VII.

Public Health, Healthcare, and Emergency Medical Services

Planning Factors

- Need to identify how to adequately distribute resources throughout the state
- Need to include partner agencies in the planning process
- Need consistent patient tracking system from scene to hospital

Organization and Equipment Factors

- Volunteer EMTs are needed
- Some jurisdictions need more ALS ambulances
- EMS telehealth is not yet available statewide
- Need supplies for mass casualty events

Supporting Training

- Stop the Bleed training

Supporting Exercises

- Omaha HCC full scale exercise
- Hospital functional exercises
- Law enforcement/mental health tabletop exercise

Operational Communications

Planning Factors

- unified communication system used by community leaders and CIKR
- TICP needs to be updated

Organization and Equipment Factors

- More trained COMLs and COMTs are needed
- More trained dispatchers are needed
- A mobile data networking capability needed for deployments

Supporting Training

- Training on new equipment needed

Supporting Exercises

- Regional Communications exercise
- Regional IMT exercise
- Cooper Nuclear Station exercise
- ARES Field Day

Cybersecurity

Planning Factors

- cybersecurity information updates needed to be provided by NIAC to locals on a routine basis
- Cyber attacks are increasing in frequency
- Public awareness in increasing
- Incident-specific IT personnel needed on deployments

Organization and Equipment Factors

- Smaller communities lack funding to hire cybersecurity experts
- CISA staff becoming more involved in the PET process
- Older 911 systems are more vulnerable to failure
- Older equipment is more vulnerable to hacks/exploits

Supporting Training

- Elected officials and new employees need training

Supporting Exercises

- Various Cybersecurity TTXs have been held

Community Resilience

Planning Factors

- Natural disasters are increasing in intensity/frequency
- There is more knowledge about EM among public, non-profits, elected officials
- Increased participation from functional needs partners
- Hazard mitigation plans need to be reviewed and revised

Organization and Equipment Factors

- Nebraska Preparedness Partnership has an increased presence across the state

Supporting Training

- CERT training being held across state

Supporting Exercises

- Cooper Nuclear Station exercise

Planning

Planning Factors

- State emergency operations plan has been revised
- NDA has revised ag guidance in local emergency operations plans
- NDA has finished a foamer guide assembly booklet for depopulation

Organization and Equipment Factors

- More LEPCs are needed across the state

Supporting Training

- ICS 300
- ICS 400
- G191 ICS/EOC Interface

Supporting Exercises

- Cooper Nuclear Station exercise
- Western Nebraska Engine Academy

Operational Coordination

Planning Factors

- Nebraska has an ad hoc Type 3 incident management team
- More locals are using WebEOC
- NEMA is implementing a resource ordering process.

Organization and Equipment Factors

- There is a need for Type 3 and 4 trained personnel
- There are two Type 3 Ops trailers in the state, none for PSC, LSC, FSC
- There is a need for increased physical and cyber security at deployment sites

Supporting Training

- ICS Position-Specific training
- More training for elected officials needed (G402)
- NEMA Basic Capstone

Supporting Exercises

- Cooper Nuclear Station exercise
- Western Nebraska Engine Academy

Mass Care Services

Planning Factors

- American Red Cross handles shelter operations in the state
- Need to work with stakeholders to develop local shelter agreements
- Increased VOAD outreach from the state level

Organization and Equipment Factors

- Many jurisdictions lack personnel to staff shelters
- Need greater development of local COADs
- Shelter supplies are reaching end of life

Supporting Training

- Need for community education on mass care/sheltering
- Need to train more volunteers to staff shelters.
- Need to cross-train CERT and citizen corps in mass care missions

Supporting Exercises

- Cooper Nuclear Station exercise
- Need to incorporate sheltering into regional exercises

Situational Assessment

Planning Factors

- Several agencies have purchased drones for situation and damage assessments

- Community Lifelines concept being introduced to more across the state
- More cameras being installed along highways and rivers

Organization and Equipment Factors

- There is a need for Situation Unit Leader trained personnel
- Continued WebEOC buildout is needed

Supporting Training

- L-964 Situation Unit Leader training to be held
- G-191 ICS/EOC Interface training to be held

Supporting Exercises

- Cooper Nuclear Station exercise
- Western Nebraska Engine Academy

Environmental Response - Health and Safety

Planning Factors

- County hazmat response emergency response plans are revised annually.
- 9 fire departments have agreements to be state emergency response teams.
- State has two radiological response vehicles for rad testing
- State has new fit testing equipment available

Organization and Equipment Factors

- SNS stockpile system is no longer providing commercially available products.
- LEPCs are lacking across the state

Supporting Training

- Hazmat Training
- Hazmat 80-40 training

Supporting Exercises

- Hazmat Tabletop exercise
- Hazmat Full scale exercise
- Need to include functional needs populations in exercises

Intelligence and Information Sharing

Planning Factors

- The NIAC is the state's fusion center
- The NIAC has moved away from NFIN (Neb. Fusion Information Network)
- Intelligence sharing has increased between the locals, NSP, and the FBI

Organization and Equipment Factors

- NSP has amassed a fleet of drones and has trained drone operators.

- Department of Ag has increased relations with NIAC and county EMs
- License plate readers and mobile AFIS units are needed

Supporting Training

- Cybersecurity training was held but more are needed
- ATAP Regional Conference held annually
- WebEOC use should be encouraged more across the state

Supporting Exercises

- Cyber Tatanka exercise held

PROGRAM REPORTING

Nebraska will periodically examine capabilities for accuracy and effectiveness to plan and exercise against the threats, hazards, and risks.

Nebraska jurisdictions will follow HSEEP guidelines with regard to program reporting. This includes:

- Compiling and recording areas for improvement, lessons-learned, and potential best practices identified from exercises and real-world incidents
- Identifying which actions are needed to address areas for improvement
- Align actions to capabilities to allow for the measurement of the effect on corresponding capabilities
- Prioritize and assign SMART corrective actions to one primary stakeholder to the greatest extent possible.

MULTI-YEAR INTEGRATED PREPAREDNESS SCHEDULE

The following pages contain the State and PET region integrated preparedness schedule.

Training Code/Title	Start Date	End Date	Quarter	Location	Mission Area	Primary Capat	Calendar	
							Year	Region
ICS 300/400	January-26	March-26	1	McCook	Response	Operational C	2026	Southwest
