Gov. Pete Ricketts Honors Tonya Ngotel as Military Department’s Employee of the Year
See Story on Page 3

Leadership Resources Presents Success Award to NEMA PIO Jodie Fawl
See Story on Page 4
THANK YOU — As 2015 comes to a close, I wish to express my appreciation to everyone who has contributed to the business of emergency management in Nebraska this year. I would like to recognize the efforts of local, state and federal partners as we work together to prepare for, respond to, recover from and mitigate against disasters here in our state.

A sincere thanks is especially due to local emergency managers who go above and beyond to meet the needs of their citizens. Not only do our local EMs work tirelessly in their own communities, but they step up to help during times of crisis, as well. For example, during this year’s avian influenza outbreak, local directors worked together in support of their colleagues in northeast Nebraska, especially to complete credentialing. It worked extremely well, allowing for accurate reporting to the USDA and enhanced security at work sites.

I want to thank our state and local partners who step up whenever needed. As an agency of just 38 staff, we couldn’t do our jobs without the support of other agencies. Thanks to our federal counterparts who have been here this year to support us as we work through DR4225. The Joint Field Office in Lincoln is still open and should remain so until February. Thanks also to the volunteer and faith-based organizations who actively assist us.

UPCOMING ISSUES — As we look ahead to 2016, we are focusing on a variety of issues and efforts that are of special notice for the emergency management community. At this year’s National Association of Emergency Management annual meeting of state directors, the re-engineering of the public assistance program was a hot topic. FEMA is striving to test a better way of doing business and helping communities affected by a disaster recover faster.

Another national issue we are monitoring is proposed changes to the individual assistance program. Based on our review the changes, getting an individual assistance declaration will be more difficult in the future. With that in mind, building and maintaining relationships with volunteer and faith-based organizations that can respond following a disaster to help families recover becomes even more important in light of potential changes to this program.

In Nebraska, we are continuing our effort at community outreach. Helping elected officials to develop an understanding of what emergency management can and can’t do is an important part of the work we do. We can help planning, exercise and training (PET) regions and local emergency management directors in this community outreach. Let us know and we can schedule a program near you.

HSGP REFORMAT — We are focussing our efforts at reformatting our Homeland Security Grant Program goals. Discovering an effective system to manage a finite resource against considerable demand is difficult, but of paramount importance. Moving forward, we need to look at how the process will be conducted. Issues of importance include:

- continued sustainment of investment justifications,
- improved stakeholder engagement, including various constituencies and subject matter experts, to review and recommend project proposals, and
- improved efficiency, clarity or refinement of the grant process.

We want to provide better guidance on eligible items and how project proposals should be structured; and we want to be more transparent on fiscal issues. We are working to empower the Senior Advisory Committee and the Homeland Security Policy Group in their roles to identify and prioritize grant-funded initiatives.

WINTER OUTLOOK — The first of this year’s storms has already hit the state, and local and state emergency managers have had frequent updates from National Weather Service staff about upcoming ice, snow and wind events like the one that accompanied our Thanksgiving holiday. Please note the winter weather awareness information included later in this issue and make sure you are prepared to travel safely this winter.

HAPPY HOLIDAYS — I’d like to take this opportunity on behalf of all the staff at NEMA to wish you all a happy holiday season and a happy new year. Once again, I’d like to thank you for your contributions to supporting emergency management in Nebraska. Your efforts are appreciated.

Sincerely,

Bryan Tuma
Nebraska Military Department Recognizes Staff

Tonya Ngotel, State Emergency Response Commission coordinator, was honored as employee of the year for the Nebraska Military Department in ceremonies at both the Nebraska State Capitol and Joint Force Headquarters on the Nebraska Air National Guard base. Each year the department recognizes an employee and supervisor of the year. Edward Raftery, an airport firefighter crew chief for the Nebraska Air National Guard Fire Department was recognized as Supervisor of the Year for 2015.

In addition, Nebraska Emergency Management Agency (NEMA) staff were among Military Department staff recognized for years of service. They included: Sue Krogman, Dave Reisen, Brent Curtis, Michael Loftis, Phyllis McCown and Nikki Weber.

Tonya Ngotel was recognized as 2015 Employee of the Year by the Nebraska Military Department by, from left, Jon Schwarz, technical hazards section manager, Bryan Tuma, NEMA assistant director, Ngotel and Maj. Gen. Daryl Bohac, adjutant general for the Nebraska Military Department.

Sue Krogman, center, NEMA information technology and communications unit supervisor, was recognized for 30 year of service to the state by NEMA Assistant Director Bryan Tuma and Gov. Pete Ricketts.

Dave Reisen, center, NEMA training and exercise unit supervisor, was recognized for 30 year of service to the state by Assistant Director Bryan Tuma and Maj. Gen. Daryl Bohac.

Mary Baker, state hazard mitigation officer, was recognized by Brig. General Richard Dahlman for her work on the 2015 state Charitable Giving Campaign.

Program Specialist Brent Curtis was recognized for 15 years with the state.

Mike Loftis, radiological systems manager, was recognized by Jon Schwarz, technical hazards section manager and Maj. Gen. Daryl Bohac for 15 years with the state.

From left, Phylis McCown, accountant, was recognized by Lt. Gov. Mike Foley, Assistant Director Bryan Tuma and Administrative Assistant III Cindy Newsham for 15 years with the state.

Nikki Weber, preparedness section manager, was recognized by Maj. Gen. Daryl Bohac and Assistant Director Bryan Tuma for 15 years with the state.
Leadership Resources, a provider of strategic planning and organizational development services, recognized six individuals and two groups by presenting them with Success Awards at its 2015 Celebration of Success event on Tuesday, Dec. 8 at Embassy Suites in Lincoln.

Jodie Fawl, public information officer at NEMA, earned one of the Success Awards presented at the event. There were 64 finalists for the award. “These individuals and businesses committed themselves to following our development processes and we are honored to help them achieve their dreams,” said Boyd Ober, president and CEO of Leadership Resources.

The nearly 250 leaders who attended this annual event had the opportunity to hear from Randy Slechta, CEO of Leadership Management International and to attend speed leader discussions led by 20 individuals who shared key insights into their success.

Fawl participated in Leadership Resources’ Effective Personal Productivity course and set and met, personal, leadership and organizational goals with the help of the tools she learned in the class.

Julie Mayers, grants unit supervisor, at NEMA was presented with a challenge coin from Brig. Gen. Richard Dahlman, who serves as deputy adjutant general of the Nebraska Military Department of which NEMA is a member.

Challenge coins are presented by unit commanders in recognition of special achievement by a member of the unit. Mayers was honored for her work planning activities for NEMA staff in addition to her regular duties. Mayers recognized Molly Bargmann, planning specialist in public assistance, for her support of those activities.
Food-related Incident Topic of Ag Dept Tabletop Exercise

Roger Conrad, exercise training officer with NEMA, served as facilitator at a Foul Fodder tabletop exercise in November. The Nebraska Department of Agriculture tabletop exercise provided participants with an overview of what happens at the local, state and federal levels during a food-related incident. The exercise focused on the role that key personnel play in containing a food chain contamination problem and protecting consumers. Information at the tabletop exercise was generated from discussions among participants as they went through a hypothetical scenario. The exercise included 40 representatives from federal and state agencies as well as representatives from the agricultural industry. Kate Speck from the University of Nebraska Lincoln Public Policy Center was also a facilitator.

Hazmat Safety Officer Course Offered at NEMA

A three-day safety officer course taught by Todd Skoglund, president of Signet North America, was offered at NEMA in November. In the demonstration at left, Skoglund illustrates how gas builds up under containment and most generally releases downward. Participants learned how to successfully perform as a safety officer at a hazmat incident.
Nebraska Emergency Management Agency (NEMA) Assistant Director Bryan Tuma honored members of the Washington County response community with commendations for their contributions during the hostile-action-Based (HAB) exercise at the Fort Calhoun Station in early August.

The commendations were presented at a Washington County Board of Supervisors meeting on Nov. 10.

Tuma began his presentation with a special thanks to everyone who planned and participated in the exercise noting that the ability to demonstrate “reasonable assurance” as required by FEMA and the NRC can only occur when all the response partners and stakeholders successfully achieve their missions.

Tuma offered a special thanks to Bill Pook, Region 5/6 emergency management director, for his contributions in planning the HAB exercise over an 18-month period.

Special commendations from NEMA were issued to Sheriff Mike Robinson and the Washington County Sheriff’s Department for their outstanding demonstration of command, control, communications and coordination capabilities with the Washington County Emergency Operations Center and the governor’s authorized representative from the incident command post. They were also recognized for incorporating the use of a new form that helped to define information that could be released from the Joint Information Center (JIC) without compromising the law enforcement response.

Captain Phil Brazelton was given a special commendation for his service and support in preparing and coordinating multi-agency communication capabilities and specifically for ensuring the NEMA event/response radios were programmed and integrated into the local response network. His knowledge and efforts saved NEMA more than $12,000 to make NEMA radios compatible and to integrate them into the system.

Dr. Mark Sand also received a special commendation for his technical expertise and proficiency in delivering radiological briefings to emergency workers at the staging area for the exercise. Sand's knowledge of dosimetry, potassium iodide, exposure limits and individual dose record forms was specifically recognized and received special acknowledgement by members of FEMA’s evaluation team.

Tuma expressed how important it was for NEMA to recognize the outstanding contributions that are being made by its partners and thanked those who received the special commendations, all the members of the Washington County response community, and the Washington County Board of Supervisors for the investment and commitments they make to ensure the health, safety and welfare of the citizens of Washington County.
Multi-year Training Plan Developed at Annual Workshop

The annual Training and Exercise Planning Workshop (TEPW) was held Oct. 22 and included participants representing the eight planning exercise and training regions and several state agencies.

The purpose of the TEPW is to develop a multi-year training and exercise plan for the state. The participants provided input into the priorities established by the Threat and Hazardous Identification Risk Assessment. They began laying out and de-conflicting a plan for exercises and training events across the state for the coming years.

Lincoln-Lancaster County Hosts First Threat, Hazard Identification, Risk Assessment

Lincoln-Lancaster County Emergency Management hosted its first Threat and Hazard Identification and Risk Assessment on Nov. 18 at the University of Nebraska-Lincoln’s Memorial Stadium.

The THIRA is an important part of the overall disaster preparedness planning process.

According to Jim Davidsaver, director of Lincoln-Lancaster County Emergency Management his agency had major assists from Lincoln-Lancaster County GIS Department, Lincoln Fire and Rescue-Hazmat, UNL Athletics and UNL’s Public Policy Center.

The Public Policy Center helped with the planning, provided facilitators for the small group discussions and assembled the data gathered during the workshop.

“We had 119 attendees from at least 57 different agencies,” Davidsaver said. “Attendees included representatives from public safety, critical infrastructure, transportation, communication, military, healthcare, non-profit disaster response and health and human services.”

Attendees were furnished with orientation information about the THIRA process before the workshop. The workshop addressed three ‘worst case’ scenarios (wide spread tornado, large scale flooding and a train derailment-hazardous material spill outside UNL’s Memorial Stadium on a football Saturday) that could significantly impact Lancaster County.

“Attendees participated in six small group discussion sessions focused on the thirty-two core capabilities for community resiliency, preparedness, response and recovery,” Davidsaver said. “Each small group 20-minute discussion focused on one of these core capabilities. Attendees self-selected which small groups they would participate in. A facilitator hosted each discussion and assembled the data.

With five facilitators each hosting six discussion sessions, the workshop efficiently covered thirty of the core capabilities.

“We were very pleased with the turnout and active participation of the attendees. The workshop is just one step in the THIRA process. The data gathered allows us to identify our desired outcome for each core capability. The next step in the process is to begin identifying the resources needed to achieve these desired outcomes and working to that end.”

Davidsaver said the workshop will lead to better plans, more effective plans and a more complete program. The THIRA was held as part of the Southeast PET Region’s requirement to conduct a THIRA.

“We are in the process of evaluating the data gathered during the workshop, but we are very pleased with our community stakeholders’ attendance and participation,” Davidsaver said. “Moving forward, we plan to host another THIRA workshop when our planning process calls for it.”

The Beacon — December
Staff Meeting Updates

Graduate Student Presents at NEMA

Left: Derek Bargmann, a graduate student from the University of Nebraska-Lincoln gave a presentation on his research into how well Nebraska’s elected county officials understand their role in emergency management. His research found that there was a lack of understanding of pre-disaster roles and that emergency managers need to make the topic a priority.

Guard Restructuring Topic of General’s Update

Right: Brig. General Richard Dahlman, updated agency staff on changes being made to the Nebraska Army National Guard. The restructuring will create new opportunities for roughly 1,100 soldiers in units in 16 Nebraska communities across the state.

NEMA Staff Participate in Cooper Station Drill in Auburn

Mike Wight, public information officer with the Department of Health and Human Services, answers questions during a mock news conference at the Cooper drill Dec. 10 as plant technical briefer Linda Dewhirst (center) looks on and sign language interpreter Peggy Williams (left) of the Commission for the Deaf and Hard of Hearing signs.

NEMA Emergency Operations Facility staff (from left) Tonya Ngotel, Alisia LaMay, Jon Schwarz and Deb Robinson, work in the Emergency Operations Facility in Auburn. As governor’s authorized representative (GAR), Schwarz made protective actions decisions based on the scenario.

Molly Bargmann of NEMA listens to a conference line in the Joint Information Center (JIC) at the Cooper off-site facility in Auburn. As communication specialist in the JIC, Bargmann gets information from the State Emergency Operations Center in Lincoln, the Emergency Operations Facility in Auburn and from local emergency operations centers in Nemaha and Otoe counties to update public information officer.

Melissa Lindell, public information officer (PIO) at the Department of Health and Human Services, works with Jodie Fawl, NEMA PIO, on a news release.

Sean Runge of NEMA serves as public inquiry specialist during the drill. Questions about rumors were directed to him.
The following list of awareness days associated with emergency management was compiled using information from the following web pages: National Weather Service, Federal Emergency Management Agency and National Safety Council. It doesn’t include all the federal and state holidays. It is intended to aid emergency management directors and anyone else who promotes preparedness and other emergency management issues in Nebraska. Included at the end of each month are some of the social media hashtags that can be used to promote awareness. If you have additions to this list, send them to: jodie.fawl@nebraska.gov. The list will be updated and posted on the NEMA website at: 2016 Special Days, Weeks and Months.

Are You Prepared for Severe Weather?

Winter storms, snow, wind chill, frost, ice and extreme cold are a coast-to-coast threat in the United States. How to stay safe in a winter storm is important and the National Weather Service (NWS), in its effort to promote a Weather-Ready Nation wants us all to be prepared.

If you know what to do before, during, and after a winter event, you can increase your chances of survival. Visit: [http://www.nws.noaa.gov/om/winter/index.shtml](http://www.nws.noaa.gov/om/winter/index.shtml) and you will find information on winter alerts, science and hazards, as well as snow coverage maps and information describing the different types of winter storms as well as how to deal with extreme cold. In addition, a broad array of educational materials are available.

**Know Your Risk**
Check weather.gov before you leave home to make sure you’re prepared for what the weather might bring.

**Take Action**
Learn about the hazards you may face in your area. Make a family communications plan. Assemble an emergency supplies kit for you home and car.

**Be A Force of Nature**
Inspire others to take action by showing your friends and family how you are prepared. Tweet or post about it or tell them in person.

For information on winter safety visit: [http://www.nws.noaa.gov/com/weatherreadynation/winter_safety.html](http://www.nws.noaa.gov/com/weatherreadynation/winter_safety.html)

**Get to Know NOAA**
The National Oceanic and Atmospheric Administration’s National Weather Service provides weather, water and climate data and forecasts and warnings to protect life and property. Its goal is a Weather-Ready Nation, one that is prepared for and responds to weather-dependent events.

NOAA’s National Weather Service leads seasonal safety campaigns to prepare the public for seasonal weather hazards.

NOAA warns the public about severe weather through Wireless Emergency Alerts and NOAA Weather Radio.

NOAA’s Storm Prediction Center issues fire weather outlooks to help local officials prepare for potential wildfires.

NOAA’s Space Weather Prediction Center provides space weather forecasts, watches, warnings and alerts.

NOAA’s Weather Prediction Center provides snow and ice forecasts from Sept. 15 through May 15.

NOAA’s Climate Prediction Center monitors drought and El Niño conditions.

NOAA’s National Hurricane Center issues Atlantic and Pacific Hurricane Outlooks as a general guide to the expected overall activity during hurricane season.

**Safety and Health Information**
The Occupational Safety and Health Administration (OSHA) provides resources for workplace preparedness and response to severe weather emergencies at [https://www.osha.gov/SLTC/emergencypreparedness/](https://www.osha.gov/SLTC/emergencypreparedness/).

Employers must ensure that workers involved in response and recovery are protected from potential safety and health hazards. OSHA also provides information and resources to assist in these efforts. Follow NWS on Twitter and Facebook for the latest news on weather preparedness.

**Get Weather.gov on Mobile Phones**
Bookmark mobile.weather.gov to make sure that you have the latest weather news and information on the go. Complete instructions are available at [http://www.nws.noaa.gov/com/weatherreadynation/mobilephone.html#.VkIJxberRD8](http://www.nws.noaa.gov/com/weatherreadynation/mobilephone.html#.VkIJxberRD8)
