Course Overview:

- This course is designed to enable the non-technical emergency worker to acquire skills in the use of mitigation.
- The course provides training in how to perform mitigation activities fundamental to reducing and eliminating long-term risk from hazards.
- It addresses the important roles of the emergency program manager (or other local government representative) in mitigation: motivator, coordinator, and monitor in local implementation of the National Mitigation Strategy.

Course Objectives:

- Analyze reasons for differences between optimal and actual mitigation roles of the emergency program manager.
- Determine strategies to build support for mitigation planning in your community.
- Analyze hazard risks for a given scenario.
- Propose a mitigation strategy for a particular hazard.
- Develop a mitigation plan implementation strategy for a given scenario.
- Evaluate the effectiveness of a community's mitigation planning efforts.
- Recommend actions to optimize the mitigation role of the emergency program manager.

Recommended Prerequisite: Completion of IS-393.a, Introduction to Hazard Mitigation, prior to enrollment.

This course is part of the FEMA Advanced Professional Series. It is one of the required courses for this certificate.

This class is sponsored by East Central PET Region and instructed by The Blue Cell, LLC.
