

Nebraska Emergency Management Agency helps people in the State of Nebraska prepare for potential disasters and works with people across the state to reduce potential damage. A big part of Emergency Management is coordinating response to disasters by supporting local emergency managers and then helping affected communities recover after a disaster. When tornadoes, floods, snow storms or other events strike a community and state resources are needed, NEMA works with emergency management staff in local areas to coordinate help for people affected by disaster.

Answers on next page.
